SERIE ANIMALS SERIES

special projects

Technical information

Animal: Build in polyester painted by mass, with gel-coat of predominant colour and anti-graffiti treatment.
Structure: Internal build in galvanized steel pipe.
Platforms: Stepable zone realized in high resistance continuous wet-pour rubber surfacing (EPDM).
Screws: On galvanized steel.
Anchoring: Galvanized steel for mounting on concrete foundation.

Example of installation with accessories.

Technical data:
Assembly: 4 pers. 4 hours.
Total high: 2,40 m.
Free fall height: 1,50 m.
Dimensions:
7,7 x 2,45 x h2,4 m.
Safety area: 61,50 m²
(For the example installation).
Biggest element dimensions: 3,40 m.
Spare parts disponibility: 3 years.

Installation.
Screwed to concrete floor using expansion plugs or threaded rod and epoxy. Finished with compacted material coating either continuous wet-pour rubber surfacing or rubber tiles.

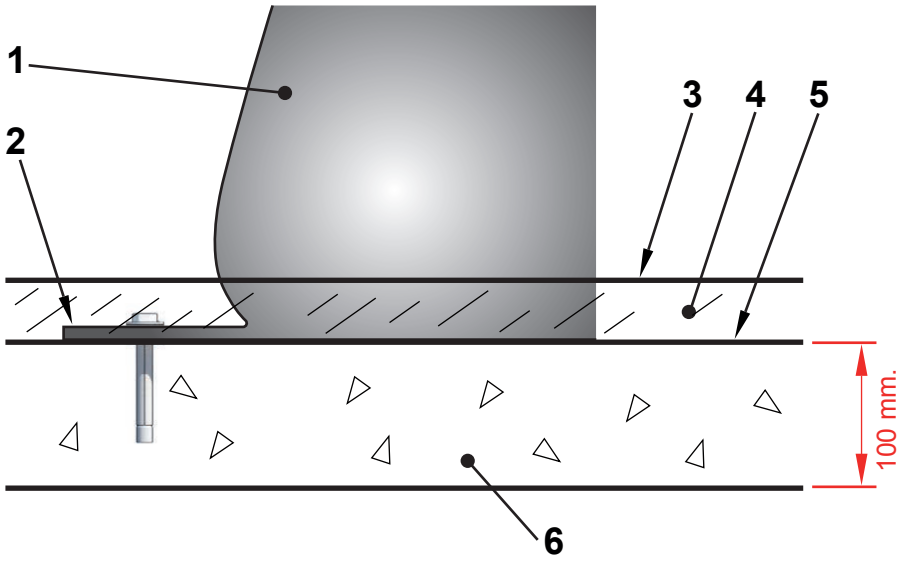

Maintenance:
Checking: all fixing points, screws and bolts must be periodically checked and tightened again if necessary. The checking date must be annotated in order to establish a control.

Inspections:
1. Routine visual inspection. An eye and functional inspection will be performed to verify that you have not suffered any vandalism damage.
2. Functional inspection. This inspection will be carried out with a periodicity of 1 to 3 months and attention should be paid to the components "sealed for life" and the equipment whose stability depends on a post.
3. Annual inspection. A complete inspection of the whole set will be carried out in order to verify that it meets all the sections of the standard and that it has not been modified.

Foundation dimensions for a straight distribution of the elements.
For other distributions, consult us.
