This playground equipment is designed to provide a fun and energetic experience for kids, encouraging their physical development as they play outdoors. Shaped like a bull, children can climb on and rock back and forth, helping them boost their balance and motor skills in a playful way.

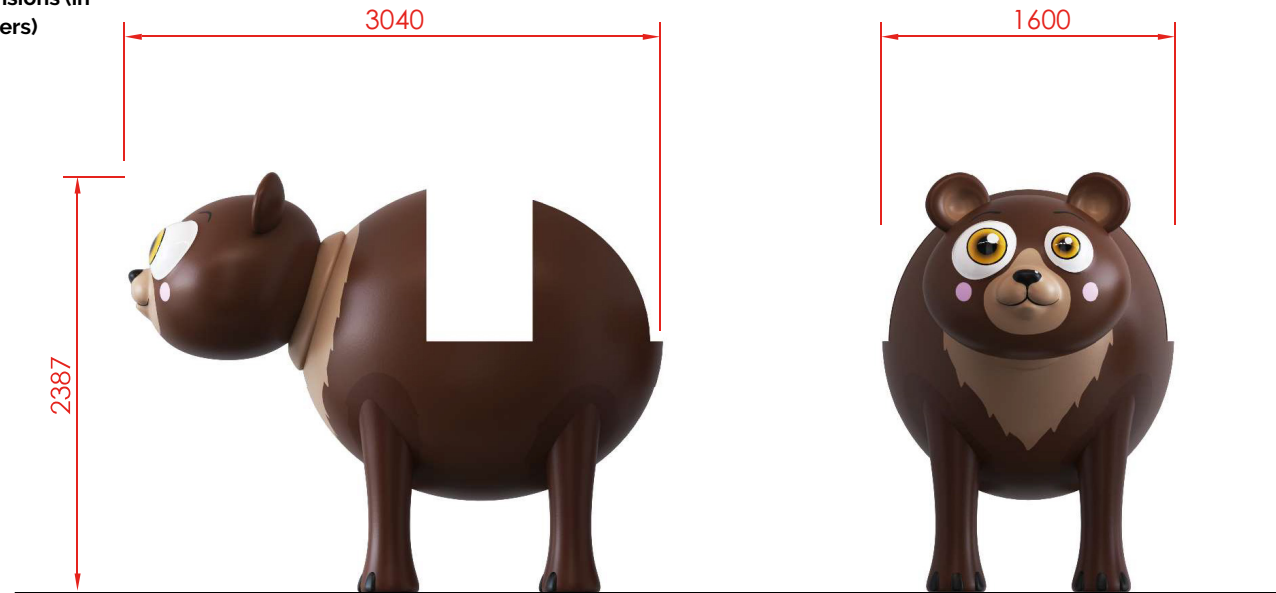

This equipment is built from tough, safe materials like galvanized steel and premium fiberglass, ensuring long-lasting durability and child safety. Rounded edges minimize the chance of injury, and the lively, colorful design instantly draws kids in, making playtime even more exciting.

This playground equipment is a great choice to get kids moving, encouraging exercise in a natural and enjoyable way. It helps build strength, agility, and endurance, supporting motor skill development while kids have fun. Perfect for playgrounds, schools, or community spaces, it lets kids play together outdoors and make the most of their time in the fresh air.

Safety zone: 31.72 m²

Installation

Secure to the concrete slab using expansion anchors or threaded rods with epoxy. Finish with a compacted surface layer—either continuous rubber or tiles.

Maintenance.

-Inspection: All mounting points, screws, and bolts should be checked regularly. If needed, retighten and adjust, recording the date for tracking. **Inspections.**

1. Routine visual inspection: Every three months, visually and functionally inspect to make sure there's no damage from misuse or vandalism.
2. Functional inspection: Conduct this check every one to three months, focusing on "lifetime sealed" components and equipment whose stability relies on a post.
3. Annual inspection: Perform a comprehensive review of the entire unit to confirm it meets all standards and hasn't been altered in any way.
