This playground equipment is crafted to deliver a fun, energetic experience for kids, encouraging their physical growth while they play outdoors. Shaped like a bull, children can climb on and rock back and forth, helping them build balance and motor coordination in an entertaining way.

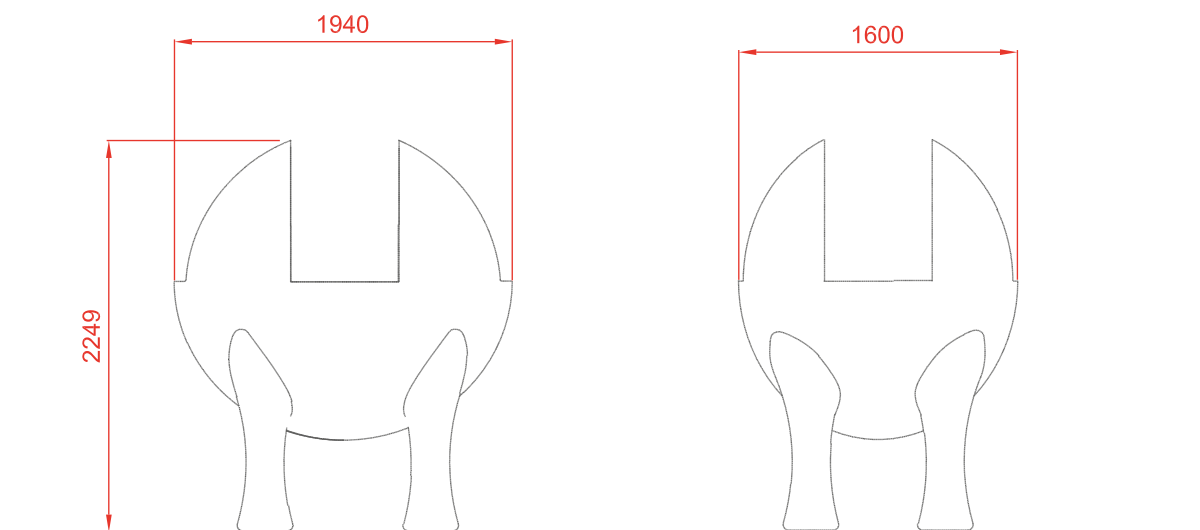

This play structure is made from tough, safe materials like galvanized steel and high-quality fiberglass to ensure long-lasting durability and child safety. Rounded edges minimize injury risks, and its vibrant, eye-catching design makes it even more appealing for kids.

This playground equipment is a fantastic choice for getting kids physically active, making exercise enjoyable and effortless. It helps boost strength, agility, and stamina, supporting motor skill development while kids have fun. Perfect for school playgrounds and parks.

Detalle del anclaje

Installation.

Secured to a concrete base using expansion anchors or threaded rods with epoxy. Finished with a compacted surface, either poured rubber or tile.

Maintenance.

-Inspection: All fastenings, screws, and bolts should be checked regularly and, if needed, tightened and adjusted. Record the date for tracking purposes.

Inspections.

1. Routine visual inspection. An ocular and functional check is carried out to ensure no damage from vandalism has occurred.
2. Functional inspection. This inspection takes place every 1 to 3 months and special attention should be given to components labeled "sealed for life" and equipment relying on posts for stability.
3. Annual inspection. A full inspection of the entire structure is performed to confirm compliance with all required standards and to verify that no modifications have been made.
