SERIE ANiMALS SERIES

This playground equipment is designed to give kids a fun and active experience, encouraging their physical development while they play outdoors. Shaped like a bull, the structure lets children climb on and rock back and forth, helping them build balance and motor coordination in a playful way.

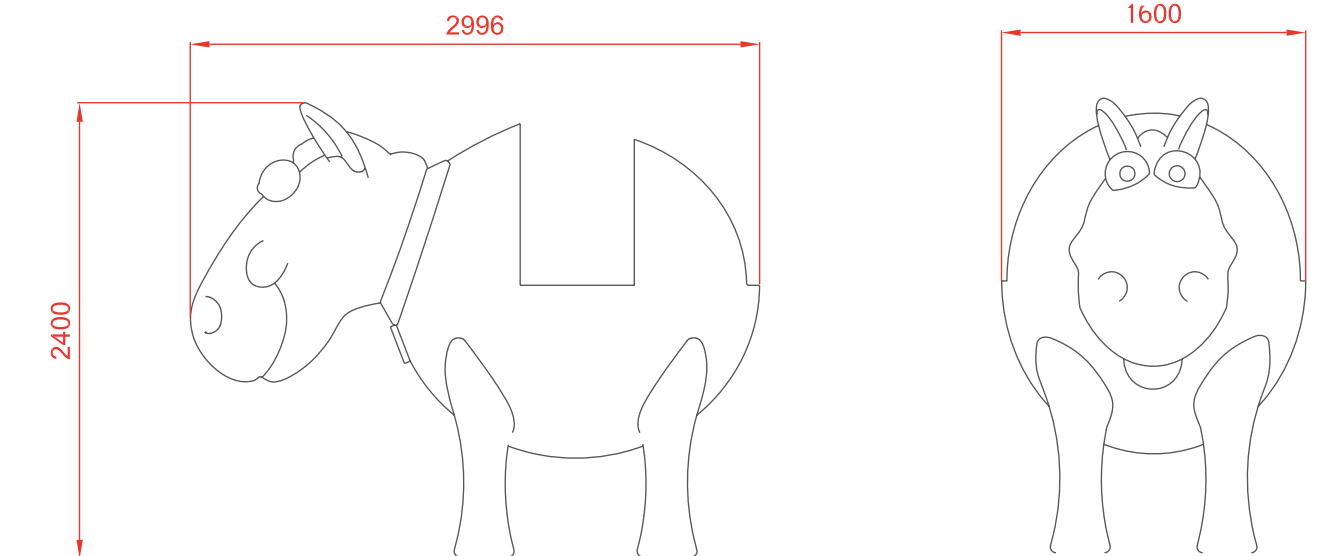

This piece is built with tough, safe materials like galvanized steel and high-quality fiberglass, ensuring both durability and child safety. Rounded edges help prevent injuries, while its bold, colorful design grabs kids' attention and makes playtime even more exciting.

This playground equipment is a fantastic way to get kids moving, making exercise fun and natural. It helps boost strength, agility, and endurance, allowing children to develop important motor skills as they play. This type of equipment is perfect for playgrounds and schools.

Safety zone: 46 m²

Detalle del anclaje

Installation.

Securely fasten to the concrete base using expansion anchors or threaded rods with epoxy. Finish with a layer of compacted material, such as continuous rubber surfacing or tiles.

Maintenance.

-Inspection: Regularly check all fastenings, screws, and bolts. If needed, retighten and adjust them, making note of the date to keep track.

Inspections.

1. Routine visual inspection. Perform both a visual and functional check to ensure there's been no damage from vandalism.
2. Functional inspection. Conduct this check every 1 to 3 months, paying special attention to "sealed for life" components and equipment supported by posts.
3. Annual inspection. Carry out a thorough review of the entire system to confirm all standards are met and that no alterations have occurred.
