

Product Datasheet

Butterfly

Device Description

Strengthens the chest, arm and back muscles. Effectively develops and shapes the upper body.

Specifications

Type: Strength equipment

Difficulty level: Medium

Recommended for: Users aged 14+ and/or at least 140 cm tall

Maximum load: 150 kg

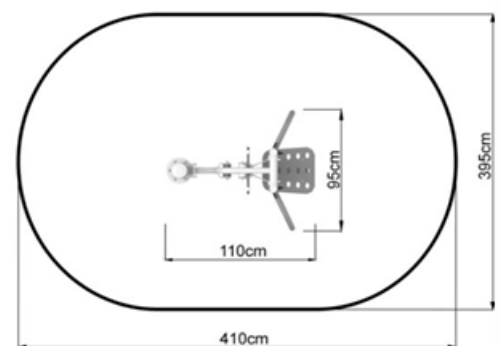

Height: 180 cm

Width: 95 cm

Length: 100 cm

Safety area: 400 × 395 cm

Free fall height: 50 cm

Exercise Instructions

Sit comfortably on the seat with your back supported. Grip the handles and pull them forward in a smooth, controlled motion. Slowly return to the starting position.

Construction

- Load-bearing structure made of 88.9 mm steel tube with a 3.6 mm wall thickness.
- Additional steel tubes: 48.3 mm diameter with a 3.2 mm wall thickness.
- Tube ends are capped. Foot platforms and seats are made of 3 mm thick steel plate.
- Galvanized cap nuts protected against loosening and maintenance-free sealed bearings.
- The equipment is fitted with rubber shock absorbers to dampen impacts.
- All metal components are abrasive blasted and powder-coated with a zinc primer and weather- and UV-resistant polyester coating.
- Complies with PN-EN 16630:2015-06.
