SERIE ANIMALS SERIES

This playground equipment is designed to create a fun and active experience for kids, helping them build physical skills while enjoying the outdoors. Shaped like a bull, children can climb on and rock, which helps them playfully develop their balance and motor coordination.

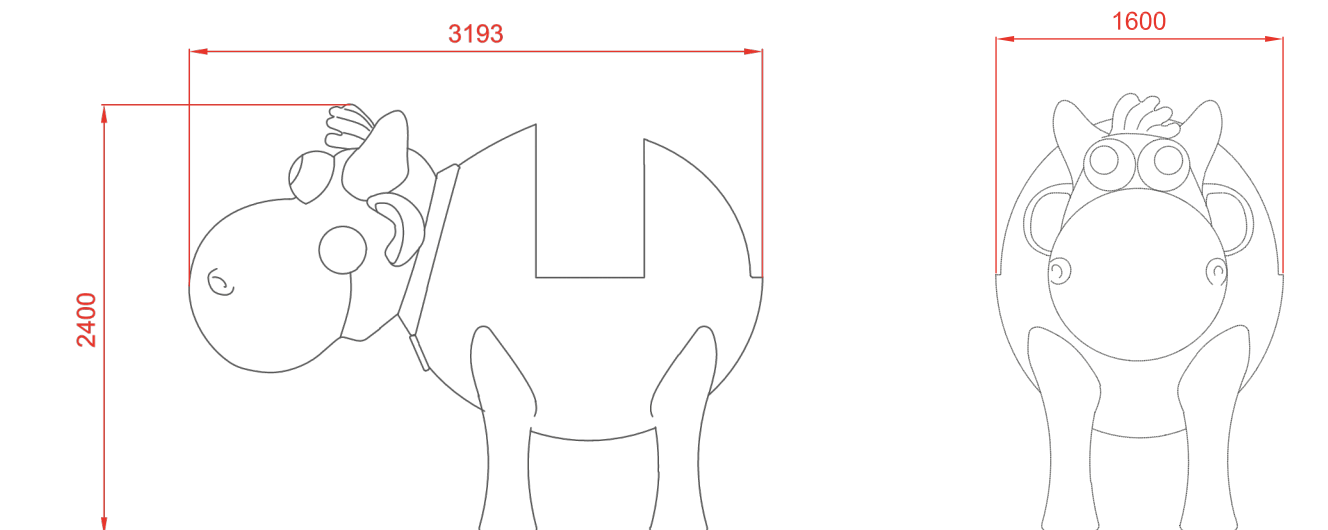

Constructed from strong, safe materials such as galvanized steel and premium fiberglass, this play equipment is built to last and keep kids secure. Rounded edges are included to reduce the risk of injury. Its eye-catching, vibrant design draws kids in, making playtime even more exciting.

This playground equipment is a great way to encourage kids to be active, making exercise fun and natural. It boosts strength, agility, and endurance, helping children develop motor skills while having a good time. Perfect for playgrounds and schools.

Safety Zone: 46 m²

Detalle del anclaje

Installation.

Anchored to a concrete base using expansion bolts or threaded rods with epoxy. Finished with a compacted surface, either poured-in-place rubber or rubber tiles.

Maintenance.

-Inspection: All fastenings, screws, and bolts should be checked regularly. If needed, tighten and adjust them, and record the date for tracking purposes.

Inspections.

1. Routine visual inspection. Perform a visual and functional check to ensure there's no damage from vandalism.
2. Functional inspection. This check should be done every 1 to 3 months, paying special attention to "sealed for life" components and equipment whose stability depends on a post.
3. Annual inspection. Conduct a thorough examination of the entire unit to confirm it meets all standards and has not been altered.
